Re: Submission of additional chemistry studies to ensure all EPA data requirements are satisfied.

Company:	Professional Disposables International, Inc.
Product Name:	Project Flash Spray
File Symbol:	9480-RU

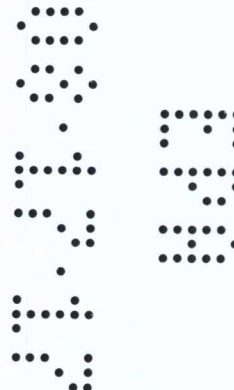

Dear Mr. Hebert,

On May 09, 2017, we submitted an application for a new end use registration for the product referenced above. As mentioned in the cover letter dated May 09, 2017, The Storage Stability and Corrosion Characteristics studies included in the Physical and Chemical Characteristics Study No. 3710-76 (MRID# 50282502) was conducted at a temperature that was too low. As a result, we are submitting Storage stability (830.6317) and Corrosion characteristics (830.6317) studies at 54°C for 2 weeks for both the basic and Alt.1 formulas. In addition, we are also submitting Oxidation/Reduction (830.6317) and Physical and Chemistry Characteristics studies for both the basic and Alt.1 formulas. The previously submitted Project Flash Spray Basic and Alt.1 CSFs dated 04/26/17 have been revised to update the flashpoint/flame extension. The enclosed Basic and Alt.1 CSFs dated 07/18/17 supersedes all CSFs on file.

Enclosures

The following documents are enclosed in support of this application:

- Transmittal Document
- EPA form 8570-1
- Copy of cover letter for Project Flash Spray dated May 09, 2017
- Certification with respect to Citation of Data
- End Use Data Matrix – Internal and External Copies
- Basic and Alt.1 CSFs dated 07/18/17 (2 copies)
- Formulator's Exemption Statement
- Three sets of chemistry studies volume listed in attached transmittal

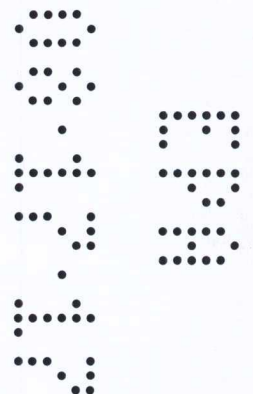

If you have any questions, please contact me at jmarcelin@pdipdi.com or (201) 746-8922

Sincerely,

Jean Claude Marcelin
